

# BECCA® Options & Accessories

For NEXT™ Spray Gun Cleaners

*The Professionals Choice*

## 5 Gallon Cans or 10 Gallon Tanks

**NEXT™ 10 30, 70 & 80 Models**

The **5 gal Cans** are standard solvent containers and come equipped with a pour spout.

**NEXT™ 70 & 80**

The **10 gal Tanks** are designed for the most demanding operations. Performance features:

- Stainless Steel Construction
- Sight Glass
- Direct Connection

## Workstation Door Cover

**NEXT™ 70 & 80 Models**

The Workstation Door Cover is available for those applications that require total closure of the system when it is not in operation. This usually applies in California & Pennsylvania

## BECCA Protect™ Film

**NEXT™ 10, 30, 70 & 80 Models**

For those who look to keeping their investment looking good through it's life, we offer BECCA Protect™ Film.

Before Removal

New Application of BECCA Protect™

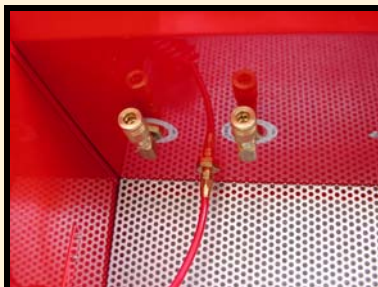

# Turbo

## Fluid Line Cleaner System

### NEXT™ 30, 70 & 80 Models

The fluid line cleaner system was designed to handle the cleaning of pressurized paint lines typically found in large or high production painting operations.

TURBO is a unique system that provides a Pre-Clean & Rinse capability through the fluid line. During this process turbulent compressed air can be added providing the Turbo cleaning effect.

NEXT 80H

Fluid Lines can be easily connected to the Turbo System utilizing your operations standard Quick Disconnects (not supplied)

NEXT 30H

## Carbon Absorption Exhaust System

### NEXT™10, 30, 70, & 80 Models

Some installations cannot accommodate exhaust duct and/or allow VOC's into the environment. BECCA has developed a Carbon Absorption system for each of the BECCA NEXT Spray Gun Cleaners. The active carbon exhaust canister mounts on top of the exhaust outlet and is easily removed for replacement. Replacement is determined by odors emitting from the unit and/or a monitor placed in the area.

## ENVIROWASH™ Filtration System

The filtration system cleans the solvent of particulate down to 25 micron when utilizing the 'Clean' solvent (Rinse) function. Filtering the "Clean" solvent maximizes the life of the filter cartridges.

### NEXT™10, 30, 70, & 80 Models

BECCA has developed an add on filtration system for its entire line of spray gun cleaners to handle EPA approved alternative solvents. (Note: Some alternative solvents require filtration while others can be distilled.) The ENVIROWASH filtration package can be ordered with your unit or retrofitted at a future date. This provides you the comfort to know that your BECCA Spray Gun Cleaner is always ready to serve you now and in the future.
