BIOREMEDIATION : How It Works in The SmartWasher® System

The SmartWasher Bioremediating Parts Washing System is both “self-cleaning” and “deregulated”. Utilizing the natural occurring process of bioremediation, the SmartWasher constantly maintains the cleanliness of the OzzyJuice without the need for hauling, skimming or evacuating the unit. The microbes (Ozzys®) in the system eat the grease, oil and other contaminants - turning harmful materials into a harmless by product of carbon dioxide and water. Eliminating the need for hauling liquid hazardous waste, this amazing process keeps the OzzyJuice clean and strong for every use.

“OzzyJuice® Cleans the Part Ozzy® Microbes Clean the OzzyJuice®”

bioremediation

the use of biological agents, such as microbes or plants to remove or neutralize contaminants.

Change your OzzyMat™ once a month and you should never need to change your parts washer fluid again.

Fleet

Aircraft
Motor Pool
Maintenance

- NO Flash Point
- NO Waste Hauling
- NO Toxic Solvents
- NO Environmental Damage
- NO Health & Safety Hazards
- NO Liquid Hazardous Wastes
- LOW or NO VOC's
- Material Safety Data Sheets (MSDS) available on the ChemFree website, www.chemfree.com.

models

300 gph Pump

Flow Control Timer

Onboard Diagnostics

Adjustable Thermostat

Heavy-Duty HDPE Construction

All units ship completely assembled and come with (1) OzzyMat™ and enough OzzyJuice® to get started.
