

How Safe Is Your Parts Washer?

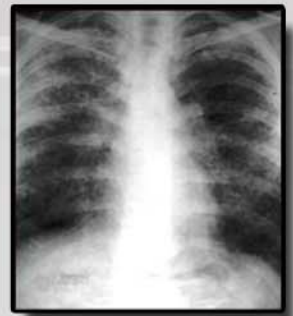

Solvent Parts Washers:

Have you ever read the precautionary warnings on mineral spirits and other solvents? Here's just a sample of what you'd find —

Skin: may cause drying, cracking, burning... Breathing: high concentrations of vapor may cause headaches, dizziness, numbness and other central nervous system effects.

Massive acute exposure may result in coma... Swallowing: irritation, vomiting, myocardial (heart muscle) injury, arrhythmias...

Chronic exposure to eyes may result in conjunctivitis...

The safe way...

SmartWasher®

For More information on the health and safety features of the **SmartWasher®** contact ChemFree Corp: 800-521-7182

While there are many reasons to use the SmartWasher® parts cleaning system, one of the most compelling is the safety benefit. For the health of both employees and our planet, the solvent-free SmartWasher system makes a lot of sense.

When using OzzyJuice® in the SmartWasher®, there are NO defined hazardous components and no carcinogens or potential carcinogens. It will not dry, crack, discolor, or infect!

OzzyJuice® is a biodegradable, nonflammable, noncorrosive, nontoxic oil dispersant and cleanser. Because OzzyJuice® is a nonhazardous solution, your facility will not encounter storage or transportation problems with containers of volatile replacement fluid.
